

COURSE DATA SHEET

COURSE OVERVIEW

CaliberRDM is an integrated requirements definition and management platform that combines interactive software simulation with traditional requirements management. This course is designed to teach you how to use all areas of CaliberRDM and get you started with using the product.

Upon completion of this course, you will:

- › Be able to define requirements.
- › Know how to create scenarios to visually depict textual requirements.
- › Be able to create simulations to represent your application.
- › Understand the integrations available with CaliberRDM.

PREREQUISITES

- › Experience working in a Windows environment
- › Navigating a GUI environment
- › Using a web browser
- › Knowledge of requirements definition and management is helpful

TOPICS

- › Module 1: Introduction to CaliberRDM
- › Module 2: Projects
- › Module 3: Requirements
- › Module 4: Scenarios
- › Module 5: Simulations
- › Module 6: Test Case Insight
- › Module 7: Reports
- › Module 8: Overview of Administrative Topics
- › Module 9: Integration with CaliberRM
- › Module 10: Advanced Simulation Techniques
