

COURSE DATA SHEET

COURSE OVERVIEW

This three-day engagement teaches you the background and architecture of your MW environment and how to maintain that environment. Two days of this workshop will use Administrator Training materials, while the third day will be used to document and maintain the customized Administrator Guide with “links” to specific documentation for your MW environment. You will learn to install software, perform periodic maintenance to the workspace as well as performing “clean-up” operations on the application server.

PREREQUISITES

- › Modernization Workbench: Application Analyzer Training
- › Knowledge of your existing environment

TOPICS

Modernization Workbench Administration Tool

- › Creating / Deleting a Workspace
- › “Invalidating” a workspace
- › Upgrading a workspace after a Release or Hot Fix
- › Refreshing the path to the workspace on the Application Server
- › Editing user access
- › Unlocking the workspace (after error resolution in BRP)
- › Configuring the workbench and the Batch Refresh Process

Administering Projects

- › SQL to query the existing projects in the workspace
- › SQL to change ownership of projects in the workspace
- › Deleting obsolete or unused Projects

TOPICS (cont.)

Administering Tasks within the Workbench

- › Setting and Managing Options
- › Registering and Verifying Legacy Source Files
- › Verification Errors – viewing and resolution

Administering Tasks on the Server

- › Installing software
- › Routing reports
- › Customizing, executing and monitoring BRP (Batch Refresh Process)
- › Performing regular maintenance (clean-up) of reports and log files

Issue / Error Resolution

- › Liaising with the MW End Users
- › Logging issues
- › Tracking / Resolving Issues

Documentation

- › Creating and maintaining your customized Administrators Guide
- › Ensuring a location for shared reports and documentation

COURSE FORMAT / AVAILABILITY

This course is available as a 3 day engagement.

INSTRUCTOR WORKSHOP & ADMIN GUIDE PRODUCTION

Duration

- 2 Day Workshop
- 1 Day Admin Guide Production

Format

- Workshop
